Fun Grasshopper Facts

- Locusts are actually species of short-horned grasshoppers, they often gather in large swarms and can destroy entire fields of crops, because a single grasshopper can eat half its body weight in plants per day. In just the U.S. they cause about \$1.5 billion in damage to grazing lands each year.
- There are around 11,000 known species of grasshopper found around the world, often inhabiting grassy fields, meadow and forest areas.
- Grasshoppers have two antennae, 6 legs, two pairs of wings and small little pinchers to tear off food such as grasses, leaves and cereal crops.
- Some species of grasshopper species make noises by either rubbing their back legs against the forewings or body, or by snapping their wings when flying.
- Grasshoppers grow to around 2 inches (5 cm), with some growing as big as 5 inches (12.7cm). Female are usually larger than males.
- Grasshoppers are often colored in a way that camouflages them in their local habitat, green ones in grassy fields, sandy colored in dirt and desert areas.
- Grasshoppers can jump about 25cm high and around 1 meter long. If humans could jump as far as grasshoppers do, relative to size, then we could leap more than the length of a football field.
- The grasshopper can jump as far as it does because its hind legs act like miniature catapults. It bends its legs at the knee, mechanism within the knee works like a spring, storing up energy. When the grasshopper is ready to jump, it relaxes the leg muscles, allowing the spring to release flinging it into the air.

• Grasshoppers are commonly eaten in African, Central and South American countries, the insect is a very good source of protein.

- ✓ School devotions this week by: Justin Miller
- ✓ No School on Fri. in observance of Good Friday
- ✓ Out of State Correspondence this week by: Louis & Susan

~BIRTHDAYS AND ANNIVERSARIES~

Happy Birthday! Apr. 16, Heidi Nissley 2013
Happy Birthday! Apr. 18, Wayne Nissley 2004
Happy Birthday! Apr. 18, Jeremy Miller 2016
Happy Birthday! Apr. 19, Robert Martin 1962

ONE SOLITARY LIFE

He was born in an obscure village, the child of a peasant woman.
He grew up in still another village, where he worked in a carpenter shop until he was 30.
Then for three years he was an itinerant preacher.
He never wrote a book.
He never held an office.
He never had a family or owned a house.
He didn't go to college.
He never traveled more than 200 miles from the place he was born.
He did none of the things one usually associates with greatness.
He had no credentials but himself.
He was only 33 when public opinion turned against him.
His friends deserted him.
He was turned over to his enemies and went through the mockery of a trial.
He was nailed to a cross between two thieves.
When he was dying, his executioners gambled for his clothing, the only property he had... on earth.
When he was dead, he was laid in a borrowed grave through the pity of a friend.

Nineteen centuries have come and gone, and today he is the central figure of the human race, the leader of mankind's progress.
All the armies that ever marched, all the navies that ever sailed, all the parliaments that ever sat, all the kings that ever reigned, put together, have not affected the life of man on earth as much as that One Solitary Life. Do You Know Who He Is?

— Author Unknown <http://emailministry.org/one-solitary-life/>

Mission & Vision Statement Of: Calvary Christian Fellowship

Mission: To realize our need of Christ.

To help one another on life's journey.

Vision: To surrender to Christ our Head, to walk in the Spirit, to love as Jesus loves.

To be a place where it's safe to share failures, struggles, hopes, and dreams.

To encourage, and empower one another to find God's purpose as we walk with Christ on our journey to Heaven.

To help the hurting find healing, and the lost experience salvation, in Christ.

To assist in physical needs among, and around us.
