Are You Ready for the Showdown?  
-Man-Made Circuits or God's Creation?

Round 3: Processing Power

-Processing Power

Technology knows a thing or two about processing power. After all, every computer comes with at least one processor that crunches up data and spits out a stream of results. Our gadgets get faster and faster all the time. The speediest supercomputers come packed with thousands of processors to solve really complicated problems. So, can your brain keep up?

While you probably won't be solving super-complicated math problems in your head, your brain is no slouch. It keeps your heart beating, it constantly monitors smells in the air, it shifts your body to keep it balanced, it figures out the words people

are saying, and it packs away important information.

But that's not what really takes the prize. Your brain contains about 100 billion tiny cells called neurons (NUR-ons). Electricity passes through different cells while you think. The more you challenge your brain, the more these cells form new connections with each other.

In other words, your brain does not just process information; it grows and adapts. Computers can't rewire themselves.

Winner: Brain

And the Winner Is . . . Your Brain!

-Contest Winner

We love computers and smart phones, but they don't stand a chance against that wrinkled brain God made.

## Announcements:

- ✓ This Evening: Free Evening.
- ✓ Youth are invited to Michael Yoder's for lunch and will be singing at Morningside afterwards.
- ✓ Wednesday Evening: Prison Service (Annex) 4:15 PM. To go: Henry, Ralph, Dennis & Loren-devotions
- ✓ Church Social Thursday evening at 6:30.
- ✓ Norman Yoder & James Yoder will be mowing our school and church yards.
- ✓ Ann and Jerry Whitaker wish to thank the church for their hospitality when they visited two weeks ago. They really enjoyed the fellowship!
- ✓ Continue to pray for Arlene, she has pneumonia in her left lung, they put her in the hospital. If she recovers they plan to continue radiation Monday as planned. She had seemed to be improving and was up & about more. Doc thinks she may have overdone it.

## ~BIRTHDAYS AND ANNIVERSARIES~

July 18, Happy Birthday! Wayne Nissley, 2004

July 19, Happy Birthday! Robert Martin, 1962

### Perspective

One day, the father of a very wealthy family took his son on a trip to the country with the express purpose of showing him how poor people live. They spent a couple of days and nights on the farm of what would be considered a very poor family. On their return from their trip, the father asked his son, 'How was the trip?' 'It was great, Dad..' 'Did you see how poor people live?' the father asked. 'Oh yeah,' said the son. 'So, tell me, what did you learn from the trip?' asked the father. The son answered: 'I saw that we have one dog and they had four. We have a pool that reaches to the middle of our garden and they have a creek that has no end. We have imported lanterns in

our garden and they have the stars at night. Our patio reaches to the front yard and they have the whole horizon. We have a small piece of land to live on and they have fields that go beyond our sight. We have servants who serve us, but they serve others. We buy our food, but they grow theirs. We have walls around our property to protect us, they have friends to protect them.' The boy's father was speechless. Then his son added, 'Thanks Dad for showing me how poor we are..' Isn't perspective a wonderful thing? Makes you wonder what would happen if we all gave thanks for everything we have, instead of worrying about what we don't have!
