

Calvary Christian Fellowship Mennonite Church

Welcome to our Worship Service!

May 3, 2015

Devotional:----- Elmer Yoder
 Message:----- Henry Nissley
 Offering:----- Missions
 SS Lesson:----- 1 Thessalonians 3

Adult and Youth Verse: And the Lord make you to increase and abound in love one toward another, and toward all men, even as we do toward you: 1 Thess. 3:12

Intermediate Verse: This people draweth nigh unto me with their mouth, and honoureth me with their lips; but their heart is far from me. Matt. 15:8

Junior Verse: If ye know these things, happy are ye if ye do them. Jn. 13:17

Primary Verse: "And a voice came out of the cloud, saying, This is my beloved Son: hear him" Mark 9:7

Preschool Verse: "This is my beloved son: hear him" Mark 9:7

SS Lesson for next week: 1 Thessalonians 4

Adult and Youth Verse for next week: And that ye study to be quiet, and to do your own business, and to work with your own hands, as we commanded you; 1 Thess. 4:11

The Earth is Spinning Faster!

April 22, 2010

The recent earthquake in Haiti has caused the earth to spin slightly faster.

Does it seem like there have been a lot of earthquakes lately? Scientists at NASA tell us that some earthquakes are powerful enough to shift the earth's axis, making the earth spin slightly faster. They estimated that after the recent earthquake in Chili, the earth is spinning 1.26 millionths of a second faster each day.

A large shift in the earth's mass can affect our planet's rotation. Usually the change in rotation is tiny, but sometimes it can actually be measured. Shifts in the earth's mass are not only caused by earthquakes, but can also happen due to changes in ocean currents or the atmosphere.*

The Chilean earthquake was one of the largest we have seen in a century. It was caused because, at some time in the past, one of the earth's plates slid under another plate. The two plates became wedged together. Eventually the energy under one of the plates became stronger than what held them together and the plates moved. This changed the earth's axis by three inches, causing the earth to spin slightly faster.

Have you missed the 1.26 millionths of a second in each day?
