### CHILDREN'S CORNER

#### Living Lights in the Deep

Deep in the ocean, the sunshine is dim or never sheds its light. Yet everything is not pitch black. Green, blue, yellow, and red lights sparkle from an unexpected source—living creatures.

#### When Light Comes to Life

If you rode in a submarine to the bottom of the ocean, the sun would disappear, and the dark water would swallow you. But light is not missing down there.

God gave creatures of all shapes and sizes the ability to glow in colorful displays. From jellyfish to squid to fish with big, sharp teeth, many animals have special features that truly glow in the dark.

They're living, breathing lights!

#### OUT OF BONDAGE

One of the biggest mathematical miracles in the world centers around Moses and the people of Israel. Moses and the people of Israel were in the desert, but what was he going to do with them? They had to be fed, and feeding 3 or 3 1/2 million people would require a lot of food.

According to the Quartermaster General of the Army, it is reported that Moses would have to have 1500 tons of food each day. Did you know that to bring that amount of food each day, two freight trains, each a mile long, would be required?

Besides, you must remember, they were out in the desert, and they would have to have firewood to cook the food. This would take 4000 tons of wood and a few more freight trains, each a mile long, for one day. And just to think, they were forty years in transit. Oh, yes, they would have to have water. If they only had enough to drink and wash a few dishes, it would take 11,000,000 gallons each day, and a freight train with tank cars 11.8 miles long, just to bring water. They had no lakes, and only a few wells. How were they to get water?

And then another thing . . . ! They had to get

across the Red Sea in one night. Now if they went on a narrow path, double file, the line would be 800 miles long and would require 35 days and nights to get through. So, there had to be space in the Red Sea 3 miles wide so they could walk 5000 abreast to get over in one night.

But, then, another problem. . . Every time they camped at the end of the day, a campground 2/3's the size of Rhode Island, or a total of 750 square miles, was needed. That comprises an area 25 miles wide and 30 miles long. Think of it! This space just for nightly camping.

Do you think Moses figured all this out before he left? I think not. You see, Moses believed in God, and that God was going to take care of these things for him. Let us take courage, we have the same God! We think our problems are so big. Remember what God can do! Just team up with God, and your problems will be in His care. Let him run your life, and as the

old song says: "He will take care of YOU"
