Lions

A male lion weighs around 180 kilograms while an average female lion can weigh up to 130 kilograms.

- A lion's roar is so powerful that can be heard from eight kilometres away.
- The heaviest lion ever weighed was at a mind-boggling 375 kilograms.
- The responsibility of hunting mostly lies with the female lion as they are better hunters than males.
- Lions are known to rest for around 20 hours a day.
- Males who possess darker manes are more likely to attract lionesses (female lions) for mating.
- Lions do not possess a lot of stamina due to which they can run only in short bursts.

•Countries like Singapore, Ethiopia, England, Bulgaria, the Netherlands and Albania have named the lion as their national animal.

•Lions have a lifespan of about 12 years.

~BIRTHDAYS AND ANNIVERSARIES~

Happy Birthday! Dec. 3, Dorcas Wagler 1990

The Forgotten Book–

By Richard De Hann

A young boy noticed a large black book all covered with dust lying on a high shelf. His curiosity was aroused, so he asked his mother about it. Embarrassed, she hastily explained, "That's a Bible. It's God's Book." The boy thought for a moment and then said, "Well, if that's God's Book, why don't we give it back to Him? Nobody around here uses it."

In many homes, the Bible is hardly used or even thought about. The only time anyone picks it up to read it is when there's trouble, sickness, or a death in the family. And even then, the person may not know where to look for the help that's needed.

How long has it been since you've picked up your Bible and studied it for your own enjoyment, edification and spiritual growth? Yes, it's God's Book – but He doesn't want it back. He wants you to keep it, to ponder it, to understand it, to believe it, and to obey its message.

Don't just **GO** to church; **BE** the Church
