A Shark

A shark possesses an amazingly sharp sense of smell and can detect even a single drop of blood in the water.

- A shark's skeleton is made up of cartilage which is tough and flexible tissues. There is not a single bone in their bodies.
- They possess powerful hearing too because of which they can hear a fish thrashing around even 500 meters away.
- Sharks have a set of smaller teeth behind the front teeth. The smaller teeth move forward and the front teeth then fall off.
- Sharks have to keep moving to get oxygen into their bloodstream as the water passes over the gills.
- Great whites can cut through the water at a speed of 30 kmph and are the deadliest of all.
- The whale shark can grow up to a massive length of 14 meters when fully developed.
- Some shark species lays eggs instead of living pups.
- A baby shark has to fend for itself right from birth as its own mother could eat it up.

•The great white has to eat large quantities of meat to keep its body temperature regulated.

Happy Birthday! Dec. 15, Iva Martin 1997

Thoughts For The Day

Be kinder than necessary because everyone you meet is fighting some kind of battle.

A sharp tongue can cut your own throat.

If you want your dreams to come true, you mustn't oversleep.

Of all the things you wear, your expression is the most important.

The best vitamin for making friends..... B1!

The happiness of your life depends on the quality of your thoughts.

The heaviest thing you can carry is a grudge.

One thing you can give and still keep...is your word.

You lie the loudest when you lie to yourself

If you lack the courage to start, you have already finished.

One thing you can't recycle is wasted time.

Ideas won't work unless 'You' do.

Your mind is like a parachute...it functions only when open.

The 10 commandments are not a multiple choice.

The pursuit of happiness is the chase of a lifetime!

It is never too late to become what you might have been.

Life is too short to wake up with regrets.

So love the people who treat you right, and forget about the ones who don't.

Believe everything happens for a reason.

If you get a second chance, grab it with both hands. If it change's your life, let it.

Nobody said life would be easy, they just promised it would be worth it.

Friends are like balloons; once you let them go, you might not get them back.

Sometimes we get so busy with our own lives and problems that we may not even notice that we've let them fly away.

Sometimes we are so caught up in who's right and who's wrong that we forget what's right and wrong.
